

Aadya Arun Talreja

B.Tech CSE · AI & ML Specialization · FinTech Minor · RV University

📍 Bangalore | +91 89717 10101 | talrejaaadya@gmail.com | [in aadya-talreja](#)

Final year B.Tech CSE undergrad (AI/ML specialization, FinTech minor, CGPA: **9.59/10**) with hands-on experience across the AI/ML stack: from LLM-based multi-agent systems and adaptive learning platforms to computer vision model optimization. Full-stack proficiency in Python, React, and Flask, with production experience shipping an iOS app to the Apple App Store. Comfortable moving from research-driven prototyping to deployed, user-facing systems.

EDUCATION

RV University

B.Tech CSE, AI & ML Specialization, FinTech Minor

2023 – Present

CGPA: **9.59/10** · Dean's List, Top 5%, 2023–25

St. Joseph's Boys' High School — ISC (PCMC)

2021 – 2023 · **90.4%**

Vidyashilp Academy — ICSE

2010 – 2021 · **95.6%**

TECHNICAL SKILLS

Languages: Python, Java, C, Solidity, JavaScript, SQL

Frameworks: PyTorch, React, Angular, Node.js, HTML/CSS

Databases: MySQL, MongoDB, PostgreSQL

Tools & Cloud: Git, GitHub, Docker, AWS

WORK EXPERIENCE

iOS Development & Engineering Intern

Jul 2025 – Oct 2025

CarbonSustain · Super Biochar – Phase 1

- Built production-ready iOS UI and user flows; integrated Google OAuth and JWT-based authentication with secure session management.
- Supported AWS cloud infrastructure, database design, and API integration, shipping the app to the Apple App Store within a three-month timeline.

Software Development Intern

Jan 2025 – Jun 2025

CarbonSustain

- Developed API and data pipeline integrations for AI-powered Scope 1, 2, and 3 emissions tracking and reporting.
- Contributed to compliance dashboard design, delivering actionable sustainability insights to global teams.

Social Project Management Intern

Mar 2024 – Jun 2024

Score-Up (The Anugraha Project)

- Led cross-functional team for a sports fundraiser; achieved **100% funding target** and produced full financial reporting.

PROJECTS

AI-Based Adaptive Learning System

React Flask LLM APIs

Developed a full-stack adaptive learning platform using React, Python Flask, and LLM APIs (Gemini, Llama) to generate personalized lesson plans and concept-wise quizzes. Built a performance analysis and recommendation engine achieving 85% weak-area detection precision and 83% recommendation relevance, with 87% quiz question accuracy.

Multi-Agent Research Assistant / Academic Paper Summarizer

GenAI LLM Multi-Agent Systems

Designed a multi-agent pipeline using large language models to automatically retrieve, summarize, and synthesize academic papers. Implemented agent orchestration and prompt engineering strategies to improve summarization accuracy and reduce manual research time.

Knowledge Distillation: VGG16 → MobileNet

PyTorch Computer Vision

Implemented knowledge distillation to compress a VGG16 teacher model into a lightweight MobileNet student on CIFAR-100. Tuned hyperparameters to reduce model size while retaining classification accuracy, optimizing for deployment efficiency.

TerraBine – Terminal Emulator

C Systems

Built a modular shell command system from scratch in C, handling backend process execution and command parsing.

ScribbleScape – Multiplayer Pictionary

Node.js React WebSocket

Developed a real-time multiplayer game using WebSocket synchronization, React front-end, and persistent score tracking.

LEADERSHIP & ACHIEVEMENTS

- Dean's List Merit Scholarship** – Top 5% of batch for 2 consecutive years (2023–2025).
- Principal's Award** – Outstanding Extra-curricular Contribution & Best All-Rounder, ISC (2022–23).
- President, Fiesta Event Management Club · Class Representative** (2023–Present) · Organising Committee: Phenomenon & Transcendence (2022).
